LICENSED BY:

Valued customer,

We herewith present you our product catalogue. At Cacti Youngplants, our team is passionate about the global horticultural market, where we have been serving professional growers with outstanding products since 2019. With our in-depth knowledge and years of experience in the industry we can help you grow your business, while providing you with the best products for competitive prices. We look forward to working with you in the coming years as we grow together.

Best regards, Wander, Anna, Ellis & Pieter.

SUPPORTING EDUCATION AT THE ZIMFLORA SCHOOLS

Cacti Youngplants is proud to support the two Zimflora Children Schools in Zimbabwe, helping to create educational opportunities for the children of employees and their families. At Cacti Youngplants and Zimflora, we believe that investing in our employees also means investing in their children's future. By providing access to quality education, we support young learners in reaching their potential and contribute to stronger, more resilient communities. We are grateful to be part of this long-term initiative and to help create opportunities through education.

FARMS

& SOCIAL RESPONSIBILITY

Great cuttings produced by committed partners

Cacti Youngplants has partnered with farms in Africa and Central America, where the different climate zones allow for optimal growing conditions for each product group. These farms are located in Zimbabwe, Tanzania, Uganda, Costa Rica and Guatemala.

Cacti Youngplants and its partners are committed to providing the best quality products and can achieve this through our close relationship with both the customers and farms. Our open line of communication gives us more control in being able to provide you, the customer, with what you want, as we take your feedback seriously and work with the farms to make improvements as and when it is needed. Not only do we strive to achieve quality in what is being produced and supplied to you, we also pay great attention to how the product is packaged and shipped, while always trying to use the most efficient means of transport, so that the product may reach you on time and in good condition.

Sustainability and social responsibility

Cacti Youngplants is also committed to sustainability, where we are working with the farms, and taking steps towards achieving this goal. All the farms hold an MPS-ABC Certificate, which is recognized worldwide as the number one environmental certificate in the floriculture industry. It is a monitoring tool that guides growers on how to reduce their impact on the environment, which encourages a more conscious use of resources to make growing their produce more sustainable.

Not only are we conscious of our environmental footprint, but we are also passionate about being socially responsible, where we are directly and indirectly involved with several projects on the ground that impact the farm workers and communities in which the farms are located.

For example, Zimflora (in Zimbabwe), has built a training centre on the farm, that allows for skills development programs and job training for its employees. We have also helped Zimflora build a creche for infants between the age of 6 months and 5 years, and school fees of all children of permanent employees are paid for by the farm. These are only a few ways in which we are constantly working towards becoming more socially responsible, so that both Cacti Youngplants and its customers can have a positive social and environmental impact on the ever changing world.

Our exclusive partners, who share our knowledge and our passion, are located in:
